U S Block Windows® Offers Instant Privacy with Coronado Block Shutters™

Pensacola, FL – U S Block Windows, a leading innovator in acrylic block technology, features Coronado Block Shutters, for instant privacy with jewel-like beauty. These beautifully designed interior shutters install like plantation shutters in about 20 minutes right over existing windows, letting in natural light while obscuring the view. With homes built closer together on tighter lots, privacy and security can be a big issue. No one wants neighbors or strangers peering into their homes or to have to look out at the next door neighbor’s brick wall or trash cans. Coronado Shutters are the perfect, quickly installed solution that add elegance and style to any room. They also eliminate the need for expensive window coverings.

Coronado Block Shutters can be custom sized in any height, any width, and installation is easy and damage-free. They are available in four frame types and two block patterns, Clear Wave and Glacier Wave. Coronado Shutters provide better insulation than wood, are ideal for wet environments and easy to clean and maintain. The frames will not warp, chip, yellow or get moldy. They mount inside or outside the window jamb.

With U S Block Windows Coronado Block Shutters, you control the view, looking in or out. You can open them at anytime and even open the existing window to let in the fresh air. When you need privacy, you have it! To learn more about Coronado Block Shutters, go to www.coronadoblockshutters.com/CoronadoHome.cfm.

U S Block Windows® is the ultimate source for privacy window solutions that can easily replace your existing windows. For Privacy with Innovative Style®, contact U S Block Windows at www.usblockwindows.com or for personalized customer service, call 1-888-256-2599.
