

PRIVACY IS A BREEZE WITH U S BLOCK OPERABLE WINDOWS

Pensacola, FL -- U S Block Windows® offers “operable” acrylic block single-hung and sliding styles, custom radius shapes and circle tops, casements and awnings -- in virtually any height, any width. That means that you can enjoy privacy with stylish shapes and acrylic block patterns with the advantage of windows that open and close. So let the breezes flow on a beautiful day or when privacy is not needed.

Luxurious and lightweight, these operable windows provide ventilation and are an ideal complement in the bath, bedroom, or any room where privacy and light are desired. The block size is 6" x 3/4". The narrow profile of the 3/4" thick block enables the operating sashes to slide by each other-- a major innovation for block windows. Both single-hung and sliders come in several standard sizes in vinyl. Special sizes and radius tops are also available.

A wide selection of casement and awning windows are also available as functional operable windows, that easily crank out to allow additional air and light into your home. With block sizes available in 6" or 8 ", there are hundreds of possible window sizes and combinations for either new or retrofit construction. Energy Star® - rated options are also available.

In addition, U S Block features Line Hinge™ Operable Acrylic Block Windows, a patented window system that is one of the strongest in the industry. It provides unique weight and load distribution capability. All Line Hinge windows come with a unique snap-in, all-vinyl, and hardware-free screen with no springs, no tabs, no pins, and no metal hardware.

U S Block Windows® is the ultimate source for privacy window solutions that can easily replace your existing windows. They add elegance and style to any room while letting in natural light. U S Block's replacement window selections install easily without damaging the home's exterior due to patented technology. For privacy with innovative style, contact U S Block Windows® at www.usblockwindows.com or for personalized customer service, call 1-888-256-2599.
