

Single Hungs & Sliders • Eastern Region

U S Block Windows offers the only single hung and slider acrylic block windows in the block window industry. The “Phoenix” series, winner of the 2001 Crystal Achievement Award for product innovation, uses our patented 3/4” thick T.R.I.O. block in a vinyl single hung or slider frame. The narrow profile of the 3/4” thick block enables the operating sashes to “slide by” one another – a major innovation for block windows.

The window features a tilt sash, aluminum-reinforced meeting rail, bevel face, and a 2” frame depth with a 1” nailing fin offset that comes standard with our patented muntin system.

The “Phoenix” series operable window enables ventilation while incorporating the architectural look of block. The window prices favorably against tempered and obscured glass products, and the window meets ANSI Safety Glazing requirements. While custom sizes are available, the “Phoenix” series comes in several standard sizes.

Eastern Region Single Hung & Slider Features

- AAMA structural tested with R25 rating
- Available for new construction with 1” nail fin offset
- Can rip fins for screw-thru jamb mount for replacement applications
- Special sizes and radius tops available
- Comes standard with patented muntin grid system or silicone
- Wave and Glacier block patterns
- White and tan vinyl frames
- Includes screen
- Utilizes spiral balance system
- Tilt sash is standard in single hungs
- J-Channel and Brick Mold accessory available for upcharge
- 18” minimum width for single hungs and minimum height for sliders
- May be mulled
- Limited Lifetime warranty

Single Hungs & Sliders • Western Region

U S Block Windows is the only source for the luxurious, lightweight features of acrylic block in single hung or slider form. Utilizing our patented T.R.I.O. block system, our single hungs and sliders are ideal as a complement to any window package

in the bath, second bath or any room where privacy and light are desired. U S Block Windows offers a fin frame for new construction, along with the highly popular frame-over flange cut to “any height, any width” for the replacement market.

Standard Sizes

Requires no cut charge since no cut is needed on non-operating panel. Panels will always be unequal in appearance.

Single Hungs				
base				
height	Unit Dim.	19 1/8"	25 1/8"	31 1/8"
26 1/2"	SH1926	SH2526	SH3126	
38 1/2"	SH1938	SH2538	SH3138	
50 1/2"	SH1950	SH2550	SH3150	

Sliders
