

U. S. BLOCK WINDOWS Acrylic Block Windows

CAUTION

DO NOT REMOVE PROTECTIVE COVERING until completion of all construction including painting, stucco, plastering and siding is complete.

INSTALLATION

Do not twist or rack window frame. Window must be installed plumb and level. Manufacturer assumes no responsibility for damage occurring due to improper cleaning, lack of care or protection during installation of the acrylic block window.

CLEANING INSTRUCTIONS

Clean with a solution of mild soap (liquid dishwashing detergent) and luke warm water. Use a clean soft cloth, applying only light pressure. Rinse with clean water and dry by blotting a damp cloth or chamois. Grease, oil or tar may be removed with a good grade of hexane, aliphatic naphtha, or kerosene. These solvents may be obtained at a paint or hardware store and should be used in accordance with manufacturer's recommendations. Other approved cleaners include: Calgon Bath Oil, Clorox Bleach, Fantastic Cleaner, Formula 409 Cleaner, Freon TF Cleaner, Liquid Comet Cleaner, Mineral Oil and Mr. Clean.

DO NOT USE: Window cleaning sprays, "after shower" cleaning sprays, kitchen scouring compounds, or solvents such as acetone, gasoline, benzene, alcohol, carbon tetrachloride or lacquer thinner. These products can scratch the windows surface and / or weaken it causing small crack called crazing. Dust with a soft damp cloth or chamois. Dry or gritty cloths may cause surface scratches and create a static charge.

To protect window and maintain its surface gloss, occasionally polish with a good plastic cleaner and / or polish. Apply a thin, even coat with a soft clean cloth and polish lightly with cotton flannel. Then wipe a damp cloth to help eliminate electrostatic charges, which can attract dust particles.

- DO NOT:** Use "Clean Shower ®"
- DO NOT:** Use Shower Wash Chemicals
- DO NOT:** Use abrasive cleaners or scouring pads
- DO NOT:** Acid Wash / Pressure Wash
- DO NOT:** Use benzene, gasoline, acetate, or carbon tetrachloride
